

# Chronic obstructive pulmonary disease (COPD) Hospitalizations: 25 and older, 2016-2018

† Rates based on counts less than or equal to 20 should be interpreted with caution; the rate may be unstable because it can change dramatically with the addition or subtraction of one case.

‡ To protect an individual's privacy, hospitalization counts under 5 are suppressed if the underlying population is less than or equal to 100,000.
