

# Percent of residents living near busy roads,<sup>†</sup> 2017

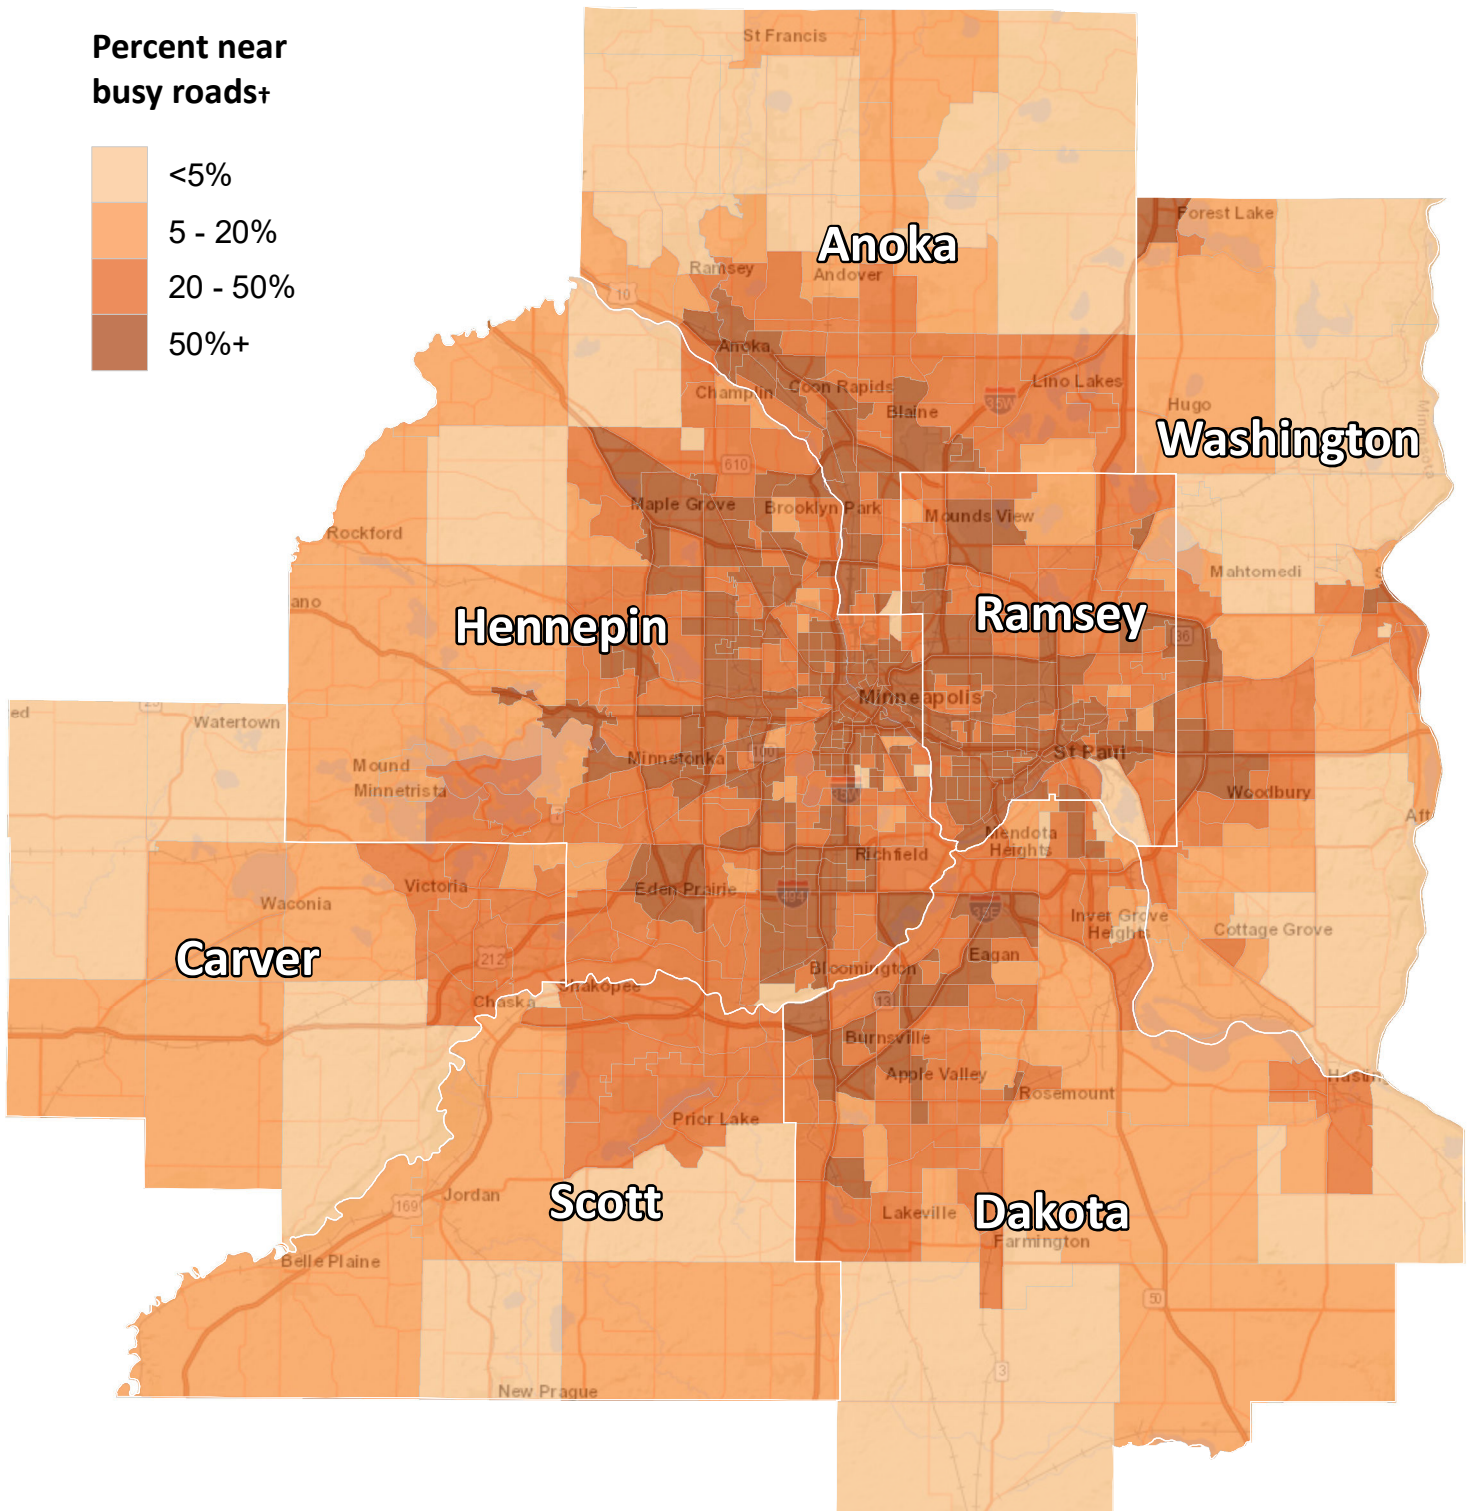

<sup>†</sup>This map displays census tract estimates of the percent of Minnesota residents living within 300 meters of busy roads, where air pollution from motor vehicle traffic is highest. Busy roads are defined as any road segment with annualized average daily traffic greater than 10,000 vehicles. Population estimates are derived from tract land area near busy roads, so may not be exact.
